Using the Relax Sauna for Cancer patients

Relax Saunas of Momentum has been successful in encouraging attendees, Holistic Health professionals, and doctors to invest in the Far Infrared technology. Many doctors are now recommending the Relax Sauna to their patients: a number of doctors have had great success with some cancer patients. A man that bought one of our saunas told us about a friend of his that was diagnosed with terminal cancer; after using the relax sauna, and other healthy living choices, his cancer disappeared. Why invest in a portable FIR sauna over installed wooden ones? Simply, the technology is far more advanced. The energy that the Relax sauna generates is unparalleled in the industry, generating 95%- 99% FIR energy while the wooden saunas produce only up to 60%. We highly recommend that whatever regimen a person goes through, they should include Sweat Therapy and the Relax Sauna in their protocol. see: www.momentum98.com/far-infrared-cancer.html
