

## Chi Gong

- *The Energy of Life*

The wavelength irradiated by the human body is called "Chi Gong" in China. The Japanese named it "Far Infrared Ray". In China, the concept of "Qi" means individual will and vital energy. The personal will must be developed through persistent exercising. However, the vital energy can only increase by the way of outward support. Scientifically, "Chi Gong" is a kind of energy. The wavelength of "Chi Gong" harmonizes with the human body and can be easily absorbed by it. The Innovation utilized by The Relax FIR Sauna is the ceramic semiconductor. As the electric current passes through the ceramic semiconductor, it radiates energy suitable for the human body. This energy is exactly the same as the "Chi" of the Chi Gong practitioner. Chung Cheng (Relax Sauna Company) has applied "Chi" in the field of their health care products. Using these health care products is like keeping company with a Chi Gong Master, which can truly take you to even higher levels of health and vitality.

The purpose of the fan is to keep the semiconductor /FIR material unit from getting too hot, just as a computer fan prevents the computer from shutting off. This allows a continuous flow of FIR energy, and makes the Relax Sauna work better than others, which turn off and on intermittently.

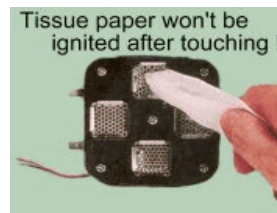

## Easy Setup

Setup the machine in seconds!

## Totally Safe

Complete safety feature
